Toro® GrandStand™

Commercial Stand-On Mowers

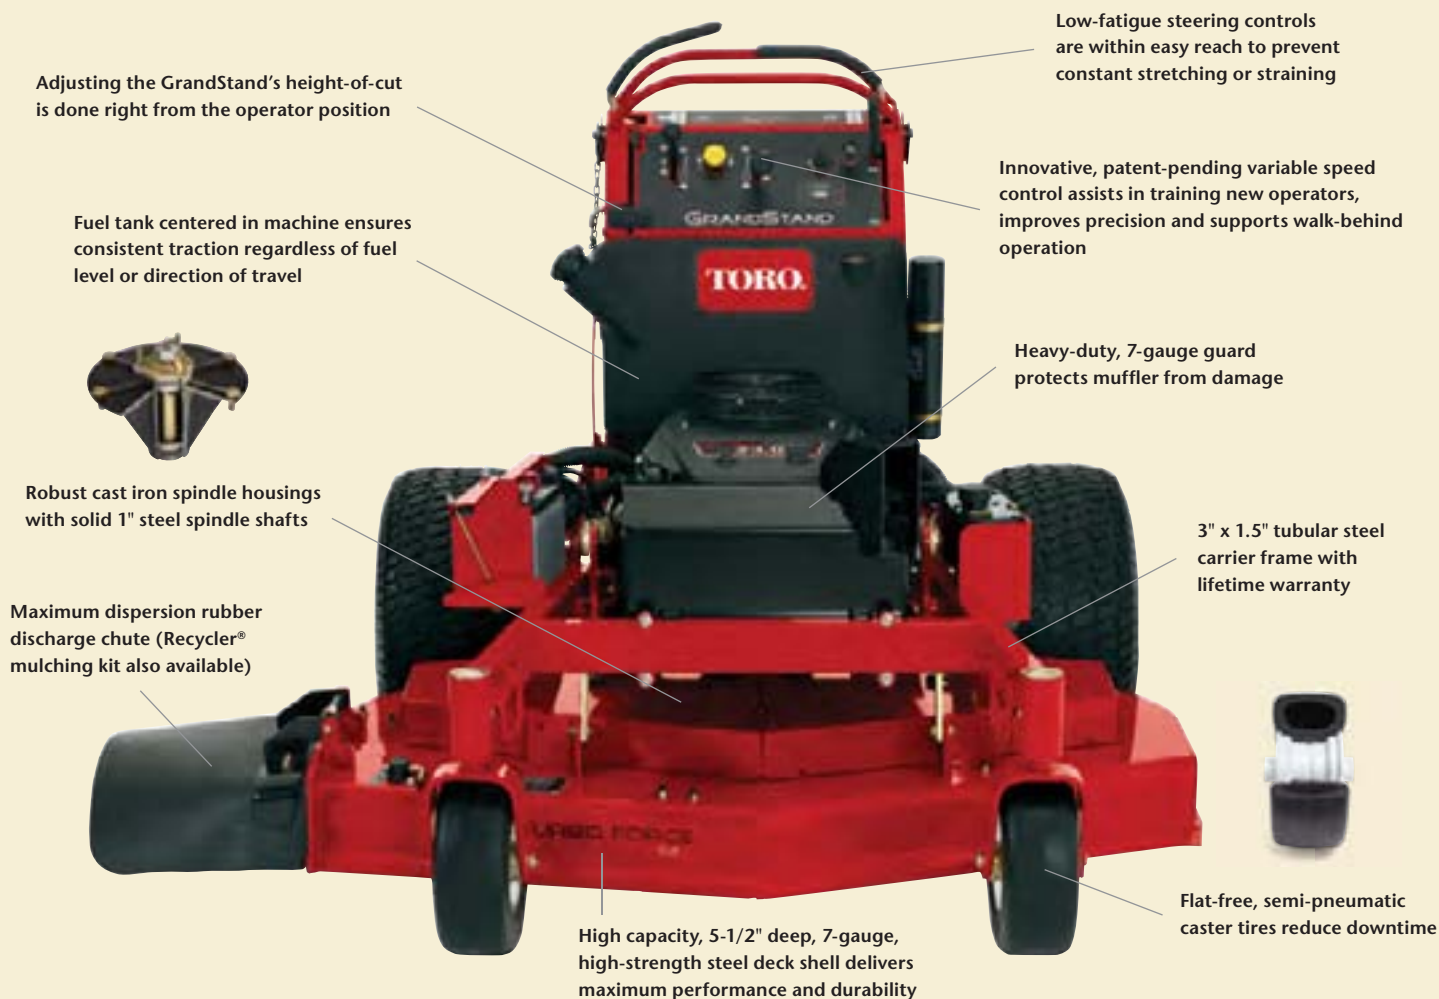

The New Toro® GrandStand™ Takes a Stand on Comfort and Performance

Through increased operator comfort, outstanding traction and handling, and an incredible after-cut appearance, the Toro GrandStand takes stand-on mower innovation to another level. Simply put, choosing a GrandStand is a decision you'll always be comfortable with.

Being On Your Feet All Day Never Felt So Good

With the Toro GrandStand, comfort rules. The operator platform suspension keeps operators fresh, resulting in less fatigue and higher productivity throughout the day. And it doesn't matter whose turn it is to use the GrandStand — the suspension is self-compensating for operators of different sizes.

Exclusive flex-ride operator platform suspension (patent pending) delivers a smooth ride and extends operator productivity

Operator presence control designed into steering controls to allow for walk-behind operation

Better tire visibility leads to less turf scuffing

Convenient front and rear tie-down points make trailering safer and easier

Large, foldable platform (patent pending) with sloped sides assists operators in shifting weight

Anti-fatigue rubber mat reduces vibration and improves footing

Protective flap keeps hydro heat away from operator's shins

Wide drive tires and a wide stance improve hillside performance

Right Fit

The Toro® GrandStand™ is big on features, not on size:

STREAMLINED DESIGN

The GrandStand conserves space to get more machines on your trailer or allows for a smaller trailer and a lighter load. And the unique, foldable operator platform makes the product even more compact for transport or storage (just 59" in length).

PROPERTY OWNER ACCEPTANCE

Some property owners have negative reactions to larger, heavier-looking mowers, and are concerned that their lawns may be damaged. With the sleeker Toro GrandStand, that problem is eliminated.

Performance

Toro's long history of innovative, performance-enhancing products shines through in the design of the GrandStand:

SPEED AND MANEUVERABILITY

The ability to turn easily, get in and out of tight spaces, and quickly get on and off the mower to pick up debris or move obstacles all contribute to less time spent per property.

VISIBILITY

The exceptional visibility from the GrandStand protects the operator, the mower and the property. The operator is better able to steer clear of obstacles, identify upcoming changes in terrain and easily pass beneath overhanging branches.

JOB WELL DONE

With proven technology such as Toro's exclusive TURBO FORCE® cutting deck, you'll be able to count on an after-cut appearance that can't be beat.

TRACTION AND HANDLING

The wide stance of the GrandStand enhances hillside stability and control. Because there are no restrictions to limit operator motion, operators can shift their weight as needed to further enhance the performance of the machine.

SMOOTH OPERATOR

Exclusive variable speed control changes drive tire response without limiting the travel of the controls, or slowing down the engine. From precise maneuvers in delicate areas to training new users, the GrandStand's easy-to-use controls make operation a breeze.

2-IN-1 VERSATILITY

In situations where the operator may want or need to walk, Toro's foldable operator platform instantly converts the stand-on to a walk-behind. When it's time to ride, just lower it back down — saving time, money and trailer space by not needing to switch from one mower to another.

Toro's Exclusive TURBO FORCE® Cutting Technology

Toro blends toughness with precision by combining a 7-gauge, high-strength steel deck shell, 1/4"-thick flex-resistant blades, massive cast iron spindle assemblies, a rubber discharge chute and a rugged bull-nose front bumper with amazing grass-cutting capabilities. The patented adjustable front baffle lets you fine tune the performance to get the exact cut and look you want under a variety of conditions. You'll easily adapt to the on-site conditions for a high-quality cut and beautiful after-cut appearance.

Stand-on mowers stand out.

More landscape professionals are using stand-on mowers every day, and it's easy to understand why. A cross between mid-size walk-behinds and zero-turn riders, stand-on mowers are fast, highly **maneuverable** and **compact**, offering the operator **improved visibility** and **greater productivity**.

Of course, not all stand-on mowers are created equal. Read on and learn more about how the **innovative Toro® GrandStand™** mower **stands above** the rest.

The gross horsepower of these engines was laboratory rated by the engine manufacturer in accordance with SAE J1940.
As configured to meet safety, emission and operating requirements, the actual engine horsepower on these mowers will be significantly lower.
